To whom it may concern,

I am a neighbor to the Harrison Concrete plant on Skunk Hill Road in Georgia, VT. I have read Mr. Peter Garceau comments concerning them operating outside business hours. I would like to say there are more instances where they are operating business outside of their allowed hours. I have taken some photos indicating other dates. I believe they made sure to mention 9/14 as a violation as I was the one at the town zoning meeting which brought photos as proof. Obviously they are not able to deny that day. Harrison company cement trucks are constantly operating outside the business hours. When they return past 6pm on weekdays or noon on Saturdays they are a disturbance to the area. Their trucks are also starting to operate prior to their 6am start. It is Harrison Concrete's job as an employer to schedule there site jobs which will allow their employees to be able to complete their work within the operational hours. This would eliminate the need for trucks leaving the facility before 6am and trucks returning after 6pm. Again when the trucks leave or enter the facility outside their designated hours of operation it is a disturbance to our neighborhood. It would be interesting to see their employees time punches, which would be a good indication as to the traffic going in and out of the facility outside operational hours. Please see the attached document I had prepared for the town zoning meeting which showed Harrison's does operate outside their hours.

Thank you
Tonya Gagne
