Subject: Comment on Land Use Panel v. Mark and Julie Pernokas

I have been a resident here at Lake Willoughby since 1946 My grandparents lived in Westmore ever since the twenties when they worked for Mrs Peene who owned the girls camp(Songadeewin) thus I am familiar with the long history of the protected treeline and vegetation Above the shoreline.

As a youth I both fished and hiked there.

it is with great sadness that I now witness the desecration of that area on the West Side which was protected so very many years.

The willful destruction of so many trees and other types of vegetation Indigenous to the area is very disturbing.

the erosion has caused some of the worst problems with dirt in the water.

i cannot understand how someone would deliberately destroy what so obviously held the banks for so many years.

the cement structure of the Pernokas, which has replaced the old one, is much larger and higher than the old one.

In previous years one could not even see concrete from my location on the East side.

why did A&R wait SO LONG to take action which is almost irreparable?

i plead with you to observe how there have been other violations on that same side of the lake by neighbors who have also damaged and stripped their land.

How much more can that high slope withstand?

A fine of \$6,000 is not a real deterrent to people with money.

One needs to increase penalties and act quicker to stop these kinds of actions!

every time it rains now and the wind is from the North we get "dirt" washing ashore.

As I am an older resident I can remember when rain brought CLEAR WATER AND BEAUTIFUL WAVES WE WOULD RUSH IN TO MEET.

Now I have to rush OUT of the water to avoid "contaminants" when it rains.

will A&R wait until Lake Willoughby is an "old" (premature) lake like Memphremagog?

or Will they have learned to act quicker?

that is the question I ask.

Cannot seem to send an email comment correctly despite many attempts it say invalid address even though this menu pops down

there have to be stricter enforcements prior and or during such reckless Mistreatment of our environment at Willoughby Lake.
